MIXING DIRECTIONS

<table>
<thead>
<tr>
<th>milk replacer powder</th>
<th>water temperature</th>
</tr>
</thead>
<tbody>
<tr>
<td>150 grams</td>
<td>38° - 45° C</td>
</tr>
<tr>
<td>fresh clean potable water</td>
<td>1000 mls</td>
</tr>
</tbody>
</table>

NOTES ON MIXING:
- For accurate mixing, use scales to weigh powder
- Always use fresh potable water for mixing milk replacer solution
- Add powder to water (38°- 45°C) using wire whisk to mix thoroughly
- Mix only enough for one feeding at a time
- Wash rinse and sanitize utensils thoroughly after every feeding

FEEDING DIRECTIONS
PER FEEDING – 2 X PER DAY

NOTE – For large frame calves, add a third feeding
NOTE – During COLD weather when environmental temps drop below 4°C for prolonged periods, increase the amount fed daily by up to 50% by providing a THIRD daily feeding of milk replacer solution in addition

*NOTES ON FEEDING COLOSTRUM:
- Feed 4 – 6 litres of good qualitycolostrum within 8 hours of birth
- Continue feeding transition milk for up to 3 days OR switch to Wet Nurse™ 20-20-20 milk replacer solution

CAUTIONS
- Directions for use must be carefully followed
- Allow calves continuous access to good clean drinking water
- Starting at approximately 1 week of age, provide a good quality calf starter on a free-choice basis
- Follow the recommendations of your feed consultant

Consult PMT’s website for further information on feeding Wet Nurse™ milk replacers www.pmtgroup.com
